1. Introduction

Welcome to OptoCare — a clinical optometry management system designed for optometrists and eye care professionals. OptoCare provides a streamlined digital platform to manage patient records and conduct comprehensive clinical eye examinations from any modern web browser.

This manual provides a complete walkthrough of the OptoCare application — from opening the app for the first time to completing and saving a full clinical examination.

This manual covers:

- Accessing OptoCare and navigating the interface
- Using the Patient Dashboard
- Registering new patients
- Opening and managing patient profiles
- Conducting a full clinical examination — Case History, Visual Acuity, Anterior Segment, Special Tests, Fundus, and Diagnosis
- Saving examination records
- Troubleshooting and frequently asked questions

Important Notice

OptoCare is a clinical record-keeping and examination tool intended for use by licensed optometrists and trained eye care professionals. All clinical decisions, diagnoses, and management plans are the sole responsibility of the examining clinician.

2. System Requirements

OptoCare is a browser-based web application — no installation or download is required. Ensure your device meets the following requirements before use:

Requirement	Details
Web Browser	Google Chrome 90+, Mozilla Firefox 88+, Safari 14+, Microsoft Edge 90+
Internet Connection	Stable broadband connection (minimum 5 Mbps recommended)
Screen Resolution	1280 × 720 minimum; 1920 × 1080 recommended
Operating System	Windows 10+, macOS 11+, iOS 14+, Android 10+
JavaScript	Must be enabled in your browser settings
Cookies	Must be allowed for session management

3. Getting Started

3.1 Accessing OptoCare

To open OptoCare, follow these steps:

1 **Open your web browser**
Launch Google Chrome, Firefox, Safari, or Microsoft Edge on your device.

2 **Go to the application URL**
In the address bar, type: https://portfolio-showcase--mounikaf6.replit.app and press Enter.

3 **Application loads**
The OptoCare Patient Dashboard will load within a few seconds. Ensure your internet connection is active.

4 **Begin working**
From the Patient Dashboard you can register a new patient, search for an existing patient, or view today's clinic statistics.

3.2 Navigation

Element	Description
OptoCare Logo	Displayed in the top-left corner of every screen. Identifies the application.
Hamburger Menu (≡)	The three-line icon in the top-right corner. Tap or click to open the main navigation menu.
Back Arrow (←)	Appears on inner screens. Tap to return to the previous screen.

4. Patient Dashboard

The Patient Dashboard is the home screen of OptoCare. It provides an overview of clinic activity and gives access to all key functions.

4.1 Dashboard Elements

Element	Description
New Patient	A blue button at the top of the dashboard. Click to open the New Patient registration form.
Total Patients	Displays the total number of patients currently registered in the system.
Visits Today	Shows the number of clinical visits recorded for the current date.
Pending Reports	Shows the number of examination records that have been started but not yet finalised.
Search Bar	Labelled "Search by name, MRD, or phone..." — use this to locate any patient quickly.
Patient Table	Lists all registered patients with columns: Patient Name, MRD No., Phone, Last Visit, and Actions.

5. New Patient Registration

Before a clinical examination can be conducted, the patient must be registered in OptoCare. The New Patient form captures all essential demographic and contact details.

5.1 Opening the New Patient Form

1. From the Patient Dashboard, tap or click the blue New Patient button.
2. The New Patient registration form will open.

5.2 Registration Form Fields

Field	Description
Full Name	Enter the patient's full name.
Age	Enter the patient's age in years.
Gender	Select from the dropdown: Male, Female, or Other.
Phone Number	Enter the patient's contact number including country code.
Email (Optional)	Enter the patient's email address if available.
Occupation	Enter the patient's current occupation.
Reg. Number	A registration number for the patient. This may be auto-generated or entered manually.
Address	Enter the patient's residential address.

5.3 Completing Registration

3. Fill in all required fields in the form.
4. Tap the blue Register Patient button at the bottom to save the new patient record.
5. To discard the form without saving, tap Cancel.
6. Once registered, the patient appears in the Patient Dashboard table and is assigned a unique MRD Number.

MRD Number

Each patient is automatically assigned a unique MRD (Medical Record Number) upon registration.

This number is used to identify the patient across all records in OptoCare.

6. Patient Profile

The Patient Profile screen displays all stored information for a selected patient and provides access to their clinical history and examination records.

6.1 Opening a Patient Profile

7. From the Patient Dashboard, locate the patient using the search bar or patient table.
8. Tap the patient's name or the relevant icon in the Actions column.
9. The Patient Profile screen will open.

6.2 Patient Profile Contents

Section	Description
Patient Header	Displays the patient's MRD number, age, and gender.
Contact Information	Shows the patient's Phone, Occupation, and Address. Fields not provided at registration are shown as "Not listed".
Clinical History	Lists all past clinical examinations for this patient in chronological order. When no examinations exist, the message "No visits recorded — Start a new clinical examination for this patient" is displayed.
Start New Exam	A blue button in the header bar. Tap to begin a new clinical examination for this patient.
Start Exam	A button inside the Clinical History section when no visits have been recorded yet. Tap to begin the first examination.

7. New Clinical Examination

The New Clinical Examination screen is the main examination workflow in OptoCare. It is divided into six sections accessible via a horizontally scrollable tab bar: Case History, Visual Acuity, Anterior Segment, Special Tests, Fundus, and Diagnosis.

7.1 Opening a New Clinical Examination

10. From the Patient Profile, tap the blue Start New Exam button in the header, or tap Start Exam in the Clinical History section.
11. The New Clinical Examination screen will open, showing the patient's details and the section tab bar.

7.2 Examination Screen Elements

Element	Description
Title	"New Clinical Examination" — confirms a new exam session is active.
Patient Info	Displays the patient identifier below the title for reference throughout the examination.
Save Record	A blue button in the top-right corner. Tap at any time to save all data entered across all sections.
Back Arrow (←)	Returns to the Patient Profile. Always tap Save Record first to avoid losing data.
Section Tab Bar	A horizontally scrollable bar at the top of the examination area containing all six section names. Tap any section name to navigate to it.

7.3 Examination Sections

Section	Purpose
Case History	Record the patient's presenting complaint and relevant background information.
Visual Acuity	Enter vision measurements for both eyes.
Anterior Segment	Record slit lamp examination findings for both eyes.
Special Tests	Record tonometry (intraocular pressure) measurements.
Fundus	Draw and annotate posterior segment findings for both eyes.
Diagnosis	Enter the final diagnosis and management plan.

Note

You can navigate between sections in any order. Data entered in all sections is saved together when you tap Save Record. Always save before leaving the examination screen.

8. Case History

The Case History section captures the patient's presenting complaint and relevant background information at the start of the clinical examination.

8.1 Fields

Field	Description
Chief Complaint (CO)	The patient's main presenting problem, described in the patient's own words.
History of Glasses	Any history of spectacle or contact lens wear, including duration and type of correction.
Systemic History (Diabetes/HTN)	Relevant systemic medical conditions such as Diabetes Mellitus, Hypertension, or other conditions with known ocular implications.

8.2 How to Use

12. Tap Case History in the section tab bar.
13. Tap the Chief Complaint (CO) field and enter the patient's presenting complaint.
14. Tap the History of Glasses field and enter any history of spectacle or contact lens use.
15. Tap the Systemic History field and enter any relevant medical conditions.
16. Tap Save Record to save your entries, or proceed to the next section.

9. Visual Acuity

The Visual Acuity section records vision measurements for both the right eye (OD — Oculus Dexter) and the left eye (OS — Oculus Sinister).

9.1 Fields

Parameter	OD (Right Eye)	OS (Left Eye)
Distance Vision	Enter the distance vision measurement for the right eye.	Enter the distance vision measurement for the left eye.
Near Vision	Enter the near vision measurement for the right eye.	Enter the near vision measurement for the left eye.
Unaided Vision	Enter the unaided vision for the right eye.	Enter the unaided vision for the left eye.
Pinhole Vision	Enter the pinhole vision for the right eye.	Enter the pinhole vision for the left eye.

9.2 How to Use

17. Tap Visual Acuity in the section tab bar.
18. The section displays a table with four rows — Distance Vision, Near Vision, Unaided Vision, and Pinhole Vision — and two columns for OD and OS.
19. Tap any cell in the table to enter the value for that measurement and eye.
20. Fill in all applicable fields for both eyes.
21. Tap Save Record to save your entries, or proceed to the next section.

10. Anterior Segment

The Anterior Segment section records findings from the Slit Lamp Examination — a clinical assessment of the structures at the front of both eyes.

10.1 Slit Lamp Examination Fields

All fields are recorded separately for the right eye (OD) and the left eye (OS). Enter clinical findings as free text in each field.

Field	Description
Cornea OD	Slit lamp findings for the cornea of the right eye.
Cornea OS	Slit lamp findings for the cornea of the left eye.
Conjunctiva OD	Slit lamp findings for the conjunctiva of the right eye.
Conjunctiva OS	Slit lamp findings for the conjunctiva of the left eye.
Iris OD	Slit lamp findings for the iris of the right eye.
Iris OS	Slit lamp findings for the iris of the left eye.
Lens OD	Slit lamp findings for the lens of the right eye.
Lens OS	Slit lamp findings for the lens of the left eye.
Pupil OD	Findings for the pupil of the right eye.
Pupil OS	Findings for the pupil of the left eye.

10.2 How to Use

22. Tap Anterior Segment in the section tab bar.
23. Scroll down to view all Slit Lamp Examination fields.
24. Tap each field and type the clinical findings for that structure and eye.
25. Complete all applicable fields for both OD and OS.
26. Tap Save Record to save your entries, or proceed to the next section.

11. Special Tests — Tonometry

The Special Tests section records Tonometry findings — the measurement of Intraocular Pressure (IOP) for both eyes.

11.1 Tonometry Fields

Field	Description
Method	The tonometry method used during the examination (e.g., NCT / Applanation).
IOP OD (mmHg)	Intraocular Pressure reading for the Right Eye in mmHg.
IOP OS (mmHg)	Intraocular Pressure reading for the Left Eye in mmHg.

11.2 How to Use

27. Tap Special Tests in the section tab bar.
28. Tap the Method field and enter the tonometry method used.
29. Tap the IOP OD (mmHg) field and enter the right eye pressure reading.
30. Tap the IOP OS (mmHg) field and enter the left eye pressure reading.
31. Tap Save Record to save your entries, or proceed to the next section.

12. Fundus

The Fundus section provides an interactive drawing canvas for documenting posterior segment findings. Separate drawing canvases are available for the right eye (OD) and the left eye (OS).

12.1 Canvas Tools

Tool	Description
OD Canvas	A circular drawing area for the right eye fundus findings, divided into four quadrants by a crosshair grid.
OS Canvas	A circular drawing area for the left eye fundus findings, with the same layout.
Colour Palette	Four colour options — Red, Green, Yellow, and Black — displayed below each canvas. Tap a colour to select it before drawing.
Eraser (◇	Tap to switch to eraser mode to correct drawing errors without clearing the entire canvas.
Delete (⍰)	Tap to completely clear and reset the canvas for that eye.

12.2 How to Use

32. Tap Fundus in the section tab bar.
33. Select a colour from the palette below the OD canvas.
34. Use your finger (on a touchscreen) or mouse pointer (on desktop) to draw findings directly on the circular canvas.
35. Use the Eraser (◇to correct specific marks without clearing the full canvas.
36. Use the Delete button (⍰) to clear the entire canvas and start again if needed.
37. Repeat the same process for the OS canvas below.
38. Tap Save Record to save your drawings, or proceed to the next section.

13. Diagnosis

The Diagnosis section is the final section of the clinical examination. It records the clinician's concluding assessment and the management plan for the patient.

13.1 Fields

Field	Description
Final Diagnosis	The clinician's final clinical diagnosis for this visit. Multiple diagnoses may be entered.
Plan / Management	The proposed treatment and follow-up plan for the patient, which may include prescription of glasses, medications, referral, or other instructions.

13.2 How to Use

39. Tap Diagnosis in the section tab bar.
40. Tap the Final Diagnosis field and enter the clinical diagnosis.
41. Tap the Plan / Management field and enter the full treatment and follow-up plan.
42. Once all sections of the examination are complete, tap the Save Record button to finalise and save the entire examination record.

14. Save Record

The Save Record button is available at the top right of the New Clinical Examination screen at all times. It saves all data entered across every section — Case History, Visual Acuity, Anterior Segment, Special Tests, Fundus, and Diagnosis — as a single examination record for the patient.

14.1 How to Save

43. At any point during the examination, tap the blue Save Record button in the top-right corner of the screen.
44. All data entered across all sections is saved together as one clinical visit record.
45. The saved record appears in the patient's Clinical History on their Patient Profile.

14.2 Viewing and Editing a Saved Record

46. Open the Patient Profile from the Patient Dashboard.
47. Scroll to the Clinical History section.
48. All saved examinations are listed chronologically. Tap any entry to open and review the full record.
49. To edit a saved record, open it, make changes across the relevant sections, and tap Save Record again.

Important

Always tap Save Record before closing the browser, navigating away, or switching apps.

Unsaved data will be lost if you leave the examination screen without saving.

15. Troubleshooting

15.1 Common Issues and Solutions

Issue	Solution
App not loading	Check your internet connection. Refresh the page (F5 or Ctrl+R). Try a different browser. Clear your browser cache (Ctrl+Shift+Delete on Windows / Cmd+Shift+Delete on Mac).
Patient not found in search	Check the spelling of the name. Try searching by MRD Number or Phone Number instead. If the patient is not registered, use the New Patient button to register them.
Data not saving	Ensure your internet connection is active. Tap Save Record before navigating away from the New Clinical Examination screen.
Fundus canvas not responding	On mobile, use your fingertip directly on the canvas. On desktop, click and drag with the mouse. Ensure you are using a supported browser.
Section tabs not all visible	Swipe left or right on the section tab bar to scroll and reveal additional sections (Anterior Segment, Special Tests, Fundus, Diagnosis).
Page layout appears broken	Set browser zoom to 100% (Ctrl+0 on Windows / Cmd+0 on Mac). Refresh the page and try again.
Pending Reports not updating	Refresh the Patient Dashboard after saving examination records. The counters update on page reload.

15.2 Clearing Browser Cache

50. In Google Chrome: Press Ctrl+Shift+Delete (Windows) or Cmd+Shift+Delete (Mac).
51. Select Cached images and files and Cookies and other site data.
52. Click Clear Data.
53. Reload OptoCare and continue working.

16. Frequently Asked Questions

Can multiple patients be registered and examined on the same day?

Yes. OptoCare supports an unlimited number of patient registrations and examinations. The Visits Today counter on the Patient Dashboard reflects all visits recorded for the current date.

Can I go back and edit a saved examination record?

Yes. Open the Patient Profile, tap the relevant entry in the Clinical History section, make changes across the required sections, and tap Save Record again to update the record.

Are the Fundus drawings saved?

Yes. The drawings made on the Fundus canvas for OD and OS are saved as part of the clinical examination record when you tap Save Record.

What does MRD stand for?

MRD stands for Medical Record Number — a unique identifier automatically assigned to each patient upon registration in OptoCare.

What do OD and OS mean?

OD stands for Oculus Dexter (Right Eye). OS stands for Oculus Sinister (Left Eye). These are the standard clinical abbreviations used in optometry and ophthalmology.

Can OptoCare be used on a mobile phone?

Yes. OptoCare works on modern smartphones and tablets through a standard web browser. For a more comfortable data entry experience, a tablet or desktop is recommended.

What happens if I close the browser without saving?

Any unsaved data will be lost. Always tap Save Record before closing the browser or navigating away from the New Clinical Examination screen.

17. Glossary

Term	Definition
OD (Oculus Dexter)	Right Eye — standard clinical abbreviation used throughout OptoCare.
OS (Oculus Sinister)	Left Eye — standard clinical abbreviation used throughout OptoCare.
MRD (Medical Record Number)	Unique patient identifier auto-assigned by OptoCare upon registration.
Chief Complaint (CO)	The patient's primary reason for seeking clinical attention, in their own words.
Visual Acuity	The clarity or sharpness of vision, typically expressed in Snellen notation (e.g., 6/6).
Distance Vision	The patient's ability to see clearly at a standard testing distance.
Near Vision	The patient's ability to read at close range.
Unaided Vision	Visual acuity measured without spectacles or contact lenses.
Pinhole Vision	Vision measured through a pinhole occluder to help determine the cause of reduced acuity.
Slit Lamp	A biomicroscope used to examine the anterior structures of the eye under magnification.
Cornea	The clear front surface of the eye.
Conjunctiva	The transparent membrane covering the white of the eye and inner eyelids.
Iris	The coloured ring of muscle in the eye that controls pupil size.
Lens	The transparent structure inside the eye that focuses light onto the retina.
Pupil	The dark central opening of the iris through which light enters the eye.
Tonometry	The measurement of Intraocular Pressure (IOP).
IOP (Intraocular Pressure)	The fluid pressure inside the eye, measured in mmHg.
NCT (Non-Contact Tonometry)	A method of measuring IOP using a brief puff of air — also called the air-puff test.
Applanation	A method of measuring IOP using a probe that gently contacts the cornea surface.
Fundus	The interior back surface of the eye, comprising the retina, optic disc, macula, and blood vessels.
Systemic History	A record of the patient's general medical conditions relevant to their eye health.
Final Diagnosis	The clinician's concluding clinical assessment following examination.
Plan / Management	The clinician's proposed treatment, prescription, and follow-up plan for the patient.
